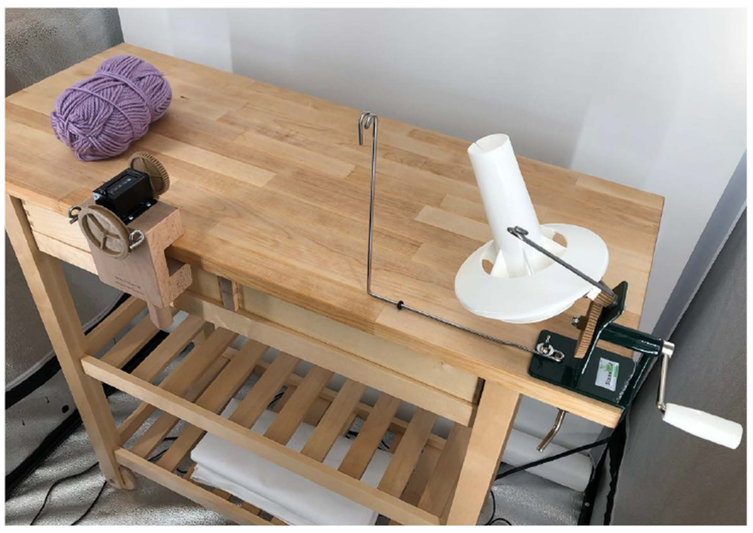
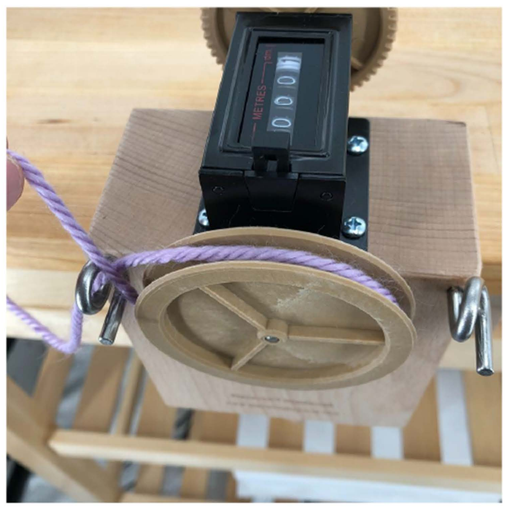
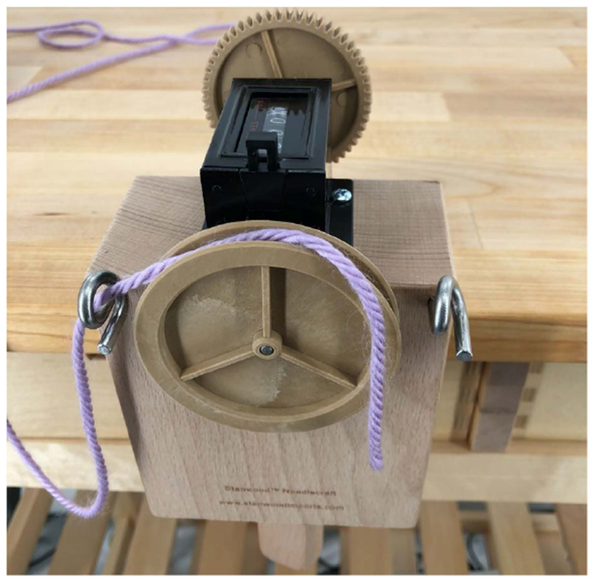
HOW TO USE YOUR YARN METER



STEP 1.

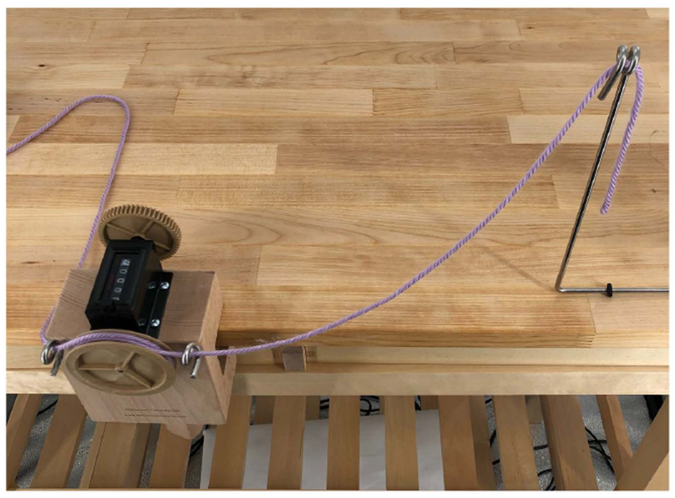
Anchor the yarn meter by clamping it to the edge of a table. Position the yarn ball winder on the right side of the table as shown. Set meter reading to 0 by pressing the reset button.





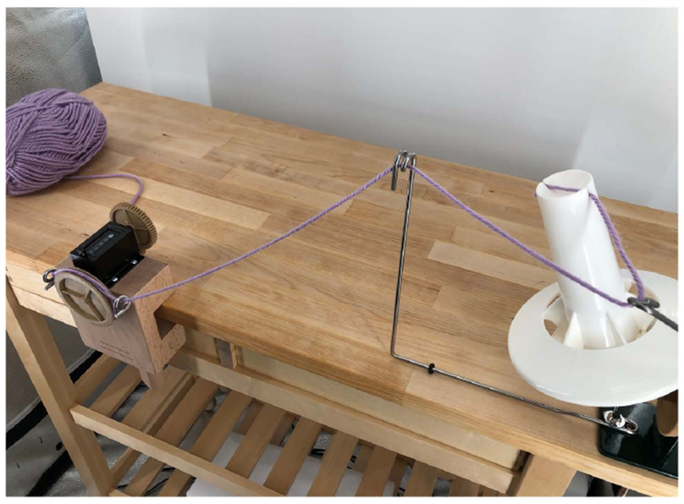
STEP 2.

Thread the yarn through the yarn guide on the left side of the meter. Guide the yarn along the top of the wheel and wrap it around the wheel once. Thread it through the yarn guide on the right side of the wheel. Pull the yarn toward the ball winder.



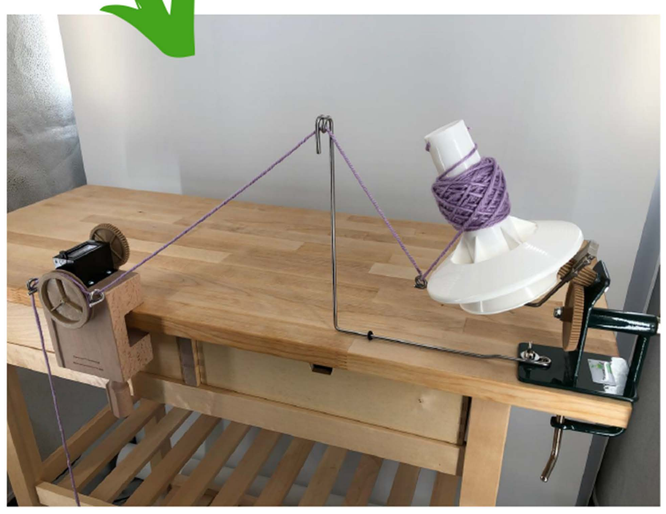
STEP 3.

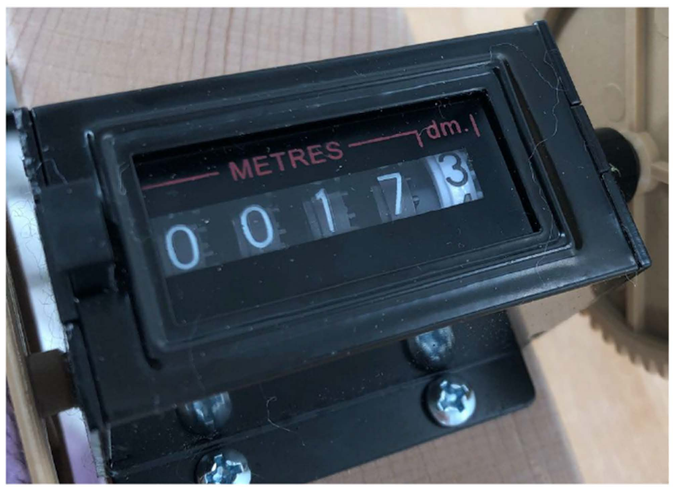
Thread the yarn first through the L-shaped wire arm, then through the revolving wire arm, and finally position it tightly into the groove of the bobbin.



STEP 4.

Begin turning the crank on the ball winder to start winding.





STEP 5.

Read yarn length in meters. Convert the number into yards by multiplying by 1.1.
