Instructions to Use Yarn Ball Winder YBW-A

1. Clamp the ball winder tightly to a sturdy table.
2. Unwind a hank of yarn and mount it on a swift winder, or other devises (your helper’s arms).
3. Thread the yarn through the wire arm and then tightly into the cleft of the bobbin. Be sure the yarn does not slip. Begin turning the crank on the ball winder clockwise to start winding.
4. Align the bobbin to its base as shown. Lock it by pushing down and turning counter clockwise.
5. Slide the yarn ball out of the bobbin. Pull the lead from the center of the ball.
