

HOW TO USE YOUR YARN BALL WINDER YBW-M

STEP 1.

To set up the wire arm, rotate the arm leftward and force it through the bump as shown to lock it in.

STEP 2.

Align the bobbin to its base as shown. Lock it by pushing down and turning counter clockwise.

STEP 3.

Clamp the ball winder tightly to a sturdy table.

STEP 4.

Unwind a hank of yarn and mount it on a swift winder, or other devices (your helper's arms).

STEP 5.

Thread the yarn through the wire arm and then tightly into the cleft of the bobbin. Be sure the yarn does not slip. Begin turning the crank on the ball winder clockwise to start winding.

STEP 6.

Slide the yarn ball out of the bobbin. Pull the lead from the center of the ball.
