

# Stanwood® Flag Pole Ring Assembly Instruction

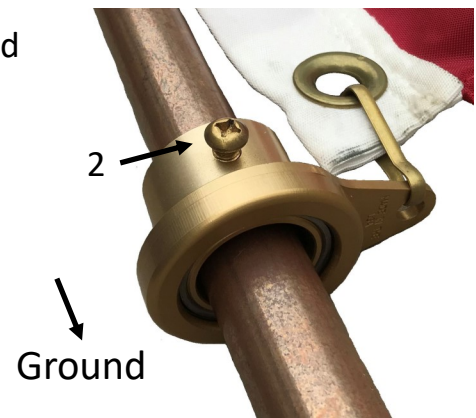

## Step 1

- Acquire a 3/4— 1 inch in diameter by 5 feet high copper plumbing pipe and a flag of your choice.
- Slide a ring at the top of the pole in the orientation shown in the picture
- Make sure the larger section of the ring faces the sky with the pole upright
- Tighten the screw(1) at the base

## Step 2

- Make sure the larger section of the ring faces the ground with the pole upright
- Slide a ring from the base of the pole in the orientation shown in the picture

## Step 3

- Attach flag to the ring clips
- Adjust the bottom flag ring, make sure the flag is stretched down as much as possible
- Tighten the screw(2) on the bottom ring
- Install flag pole on flag mount
